# Enhance Your Profitability With The LCBS Platform

When it comes to HVAC system control, different customers have different needs. Honeywell's LCBS platform gives you more flexibility to deliver the right solution, both now and in the future. For entry-level customers who just want an affordable product they can build on, LCBS T is a simple, cost-effective choice. LCBS Connect™ takes HVAC system control to the next level with cloud connectivity for proactive monitoring and diagnostics from anywhere, anytime. Both products offer scalability with unmatched simplicity, making it easy to customize the solution to the exact needs of each customer. That means more opportunities for you to grow your revenue with add-on sales of sensors, VFDs and other HVAC field devices down the road.

## LCBS-T ECONOMIZING COMMERCIAL THERMOSTAT Ideal for Entry-Level Customers

LCBS T is designed for customers who want a simple, efficient way to save on energy costs. It includes a sleek, full-color wall module and a controller with a built-in economizer, saving time and costs compared to purchasing and installing an economizer separately. More than just a competitive commercial thermostat, LCBS T is an expandable platform that seamlessly integrates with a wide variety of HVAC field devices, addition of sensors, VFDs or a cloud gateway with no rewiring required.

That flexibility makes LCBS T an approachable, low-risk way for budget-conscious customers to step into building automation without a major upfront investment. It's ready to grow as your customers' needs and expectations change, providing more opportunities for you.

## LCBS CONNECT Expand Your Opportunities

LCBS Connect uses connectivity to make it easy for you to monitor your customers' HVAC system operations from wherever you are. In many cases, LCBS Connect allows you to proactively handle issues before your customers are even aware of them. Mobile alerts and remote diagnostics allow you to save time while keeping customers happy, so you can take on more service contracts without devoting additional resources. Plus, system analytics reports can provide you with valuable intelligence, uncovering opportunities to maximize energy efficiency and savings.

The LCBS Connect platform includes a full-color touchscreen wall module, a controller with a built-in economizer, and a gateway. It's also easily expandable, offering the option to add sensors, VFDs and many other building automation solutions as your customers' needs change.

*Harness the power of data to drive business opportunities and keep your customers happy.*

### FEATURES

Intuitive 4.3-inch color touchscreen wall module with temperature and humidity control

Customizable programming and display options with 7-day/holiday scheduling

Built-in optional economizer

Two-wire SYLK bus simplifies installation

# PEACE OF MIND FOR YOUR CUSTOMERS, OPPORTUNITIES FOR YOU

Backed by more than a century of building control experience, Honeywell's trusted, tested products create a powerful and stable system that your customers can build on. Put Honeywell's flexible LCBS platform to work for you and grow your business with ongoing opportunities for expansion.

Find out how LCBS products can benefit you with satisfied customers, fewer unscheduled service calls and more business with add-on sales. From the simple to the complex, there's a solution to meet your customers' needs.
