

Replacement Cylinders

Remember to check your cylinders regularly!

Thank you for purchasing a Nortec humidifier. Over forty years ago, we saw the need for a humidifier design that would end the time-consuming and costly maintenance that was required by other humidifiers. The main problem to overcome was to easily remove the minerals that are left behind when water is boiled. At the same time, a humidifier was needed to produce clean steam and maintain long-term efficient operation.

The Nortec electrode steam humidifier, with disposable cylinder, meets all of the above criteria.

As clean steam is produced, the minerals that are in the water remain in the steam generating cylinder and are periodically removed through the automatic drain system. Nortec's patented auto-adaptive control system is designed to produce 100% of rated output capacity right up until end of cylinder life. At this time, the cylinder is easily removed and replaced with a new clean cylinder.

While other humidifiers must be totally disassembled for cleaning and require hazardous acids to remove the minerals, the cylinder in your Nortec humidifier is easily removed and replaced. Since the cylinders are produced of inert plastics and retain only the water borne minerals, disposal problems are at a minimum.

This ease of cleaning and cylinder replacement is one of the main features that helps reduce customer maintenance costs. It allows optimum service from the humidifier and keeps the time required for maintenance to a minimum.
